HARVEST CLOSURE

Closure Area

This area is closed to the public from 27 February 2023 to 22 December 2023 for safe harvesting access and movement. The closure applies to the entire marked area for this duration.

Gazetted roads around the closed area will remain open and can be used to detour around the closure, except for brief periods of traffic control when harvesting near these roads.

The closure applies to all public access including to motor vehicle drivers and riders, cyclists, horse riders and walkers, including people exercising dogs. Only authorised forest workers can enter the closure area.

Plantation forests are working forests and worksites can be extremely hazardous. Signs are erected for your safety and compliance, and you must never enter a closed area or work site even if you can't see any activity.

Unauthorised access is an offence under the Forestry Act 1959 and Work Health and Safety Act 2011 and significant penalties apply. Back-to-base surveillance will be in place to record and report unauthorised entry.
