

HQPlantations Cultural Heritage Map

Indicates HQP plantation forest 

This map attempts to show the connection between Indigenous Peoples' country and HQP's plantation forests. The information was obtained from HQP's GIS cultural heritage layers in 2019 and other publicly available information. There are regional maps and accompanying profiles with more detailed information about the Indigenous Peoples shown here. This information has been compiled by University of Queensland internship student Grace Laird and mapped by Shona Heading from HQP. The Indigenous Peoples represented may not agree with these boundaries and they will be adjusted if this is brought to our attention.
